

Contact GPS 3

Contact GPS 3

Contact GPS is a combined anti-theft device and GPS tracker for all purposes. You can theft protect your ATV, track your dog or monitor your boat. The device is IP 67-rated and can withstand all weather. Contact GPS 3 has no external contacts that can cause moisture problems. Even charging is done wirelessly. Battery life is up to 1 year in guard mode.

Safety for your dog

With Contact GPS 3 you always know where your dog is. The range is unlimited since the unit uses the GSM network. Follow your dog, your hunting companions and their dogs directly through the Contact GPS app on your phone. Maps are downloaded automatically for your area and you can choose from terrain map, real estate map (in Sweden and Norway) or satellite map. Should GSM coverage be unavailable, you can track the dog with the radio transmitter that is always available as backup.

Theft protect your boat

More than 1 boat engine is stolen every 4 hours in Sweden. Every year, boats and boat engines worth about 250 million SEK is stolen and it is a sum that increases from year to year.

With Contact GPS 3 you can safeguard your boat by hiding the device in the boat.

Let friends and family follow you on your trip

Take your Contact GPS 3 with you on your hike. Safety for you and fun for your loved ones.

Should an accident happened, your family and your friends know exactly where you are. You can also follow your route afterwards and see where you have been.
